

New water events map provides many benefits

The map provides:

- Current information on water quality issues and outages that may impact you.
- Approximate number of customers affected and restoration status.

Enroll in MyTPU.org/Account to receive:

- Timely notifications of water main flushing and planned and unplanned outages.
- Leak notifications and access to detailed water use data.
- Other helpful tools including AutoPay and paperless billing.

Our water events map and website are mobile responsive, so you can access them on your smartphone in real time.

Fix outdoor leaks to save money

Household leaks can waste more than 10,000 gallons of water every year. Repairing leaks will save water which can help lower utility bills, while protecting our water supply this summer.

- Repair garden hose drips and leaks.
- Fix leaky outdoor faucets and replace washers.
- Inspect sprinkler systems for broken heads and parts.
- Connect irrigation pipes and valves securely.
- Install a smart irrigation controller to improve water efficiency.

For easy ways to water less and save money, visit [MyTPU.org/WaterSmart](https://www.mytpu.org/WaterSmart).
