# Pre-Apprenticeship

Pre-apprentices gain exposure to the trades and become competitive candidates by learning valuable skills that incorporate real-world and classroom experiences.

Learn skills such as:

- Basic electricity
- Climbing structures safely
- Proper tool use
- Assisting journey-level workers
- Safety principles
- Obtaining first-aid, flagging, and forklift certifications
- Obtaining a Commercial Driver License (CDL) permit

If you enjoy working with your hands or are eager to learn the electrical trades, apply for our electrical pre-apprenticeship!

# Apprenticeship

You can help make a lasting impact on our community by choosing one of the three career paths.

**Line** - Construction, maintenance, and repair of electrical overhead and underground distribution and transmission systems.

**Wire** - Construction, maintenance, and repair of electrical substations and underground network.

**Meter** - Test, repair, calibrate, and install meters, electrical, and electronic support equipment.

## Work areas

- Hydro projects
- Transmission lines
- Distribution lines
- Underground network
- Residential meter
- Commercial meter
- Engineering/Prints
- Substations
- Remote sites
