

POWER MOVE #27

Getting \$500 to install a new water heater.

[Install one. Get a rebate. Done.]

A smarter way to heat your water.

When you replace your electric water heater with a hybrid model, you're saving in two ways: You're using less energy thanks to super-efficient heat pump technology, and saving on utility bills from reducing your hot water costs by as much as 60%. Considering that heating water is often the second-highest source of home energy use, that's a pretty big deal.

**Use less. Save more. Get \$500 back.
It's almost too good to be true.**

▾ OTHER POWER MOVES TO PULL OFF:

- **Deferred loans** on heating and cooling systems, windows and more—where you owe nothing until you sell your home.
- **Rebates** on heat pumps, smart thermostats, and more.
- **Zero-interest loans** on heat pumps, windows, insulation and more.

See what you qualify online or call 253-502-8363.

**SAVE ENERGY. SAVE MONEY. SIMPLE.
NOW THAT'S A POWER MOVE.**
